IDEAS FOR SUPERVISION

For the child who engaged in CSB

01

EYES ON, EARS ON

- Monitored continuously when in the presence of other children
- E.g., No playing behind closed doors or in areas of the home/community where an adult cannot **see** and **hear** them

02

WHO SLEEPS WHERE?

- Not sleep in the same bed with other children, and if possible, sleep in a room alone
- Some families create plans that include a parent sleeping with the child who has engaged in CSB or the youngest children in the home

03

PERSONAL SELF-CARE IS PRIVATE

- Take care of personal self-care in the bathroom without the presence of other children
- If young, and requiring help with toileting, bathing, etc., an adult should provide assistance

04

NO TAKING CARE OF OTHER CHILDREN

- Not be given any opportunity for assuming a role of authority over younger or more vulnerable children
- E.g., Not be a special helper or babysitter and should not be told to "watch" other children
- Seek support of extended family or community agencies

05

PUBLIC BATHROOMS & CHANGE ROOMS ARE PRIVATE

- Supervised while entering public bathrooms or change rooms
- E.g., The use of a single stalls
- Be clear about privacy by establishing a rule that there is "no peeking over or under stalls."
